

DEPTH OF USABLE-QUALITY GROUND WATER TO BE PROTECTED

PLEASE READ ALL INSTRUCTIONS

The information requested is essential in order for this agency to provide an appropriate response. Please allow for receipt of this form in our offices at least two weeks before your operation begins. Due to the volume of these requests, at times, it may be difficult for us to handle telephone inquiries. Complete, keep the bottom sheet (goldenrod) for your files, and mail the top 3 sheets of the 4-sheet set of carbon-backed forms with a map to the address below. One sheet bearing our response will be returned to you. Another will be sent to the appropriate district office of the Railroad Commission. Individuals are entitled to request and review their personal information that the agency gathers on its forms. They may also have any errors in their information corrected. To review such information, contact us at 512/239-3282. If you have questions on how to fill out this form or about the Surface Casing program, please contact us at 512/239-0115.

Additional remarks: _____

To protect usable-quality ground water at this location, the TEXAS COMMISSION ON ENVIRONMENTAL QUALITY recommends:

CO-SCURRY, SUR-H&TC, BLK-97, SEC-198, LSE-LION DIAMOND M UNIT, #1,39/400; SECTION 198 ...

The interval from the land surface to a depth of 400 feet must be protected.

This recommendation is applicable for all wells drilled in this SECTION 198.

DO NOT WRITE HERE
FOR TCEQ USE ONLY

Very truly yours,

Jack M. Oswalt, P.G.

Date

October 17, 2008

Geologist, Surface Casing, TCEQ

NOTE: Unless stated otherwise, this recommendation is intended to apply only to the subject well and not for area-wide use. Approval of the well completion methods for protection of this ground water falls under the jurisdiction of the Railroad Commission of Texas. This recommendation is intended for the normal drilling, production and plugging operations only. It does not apply to saltwater disposal operations into a nonproductive zone (RRC W-14)
